## ***From Fleeting Blossoms to Lasting Art***

A Botanical Journey of Timeless, Minimal, Nature-inspired Prints

Welcome to my world—a slow and soulful studio based in Utrecht, where nature, art, and emotion intertwine.

As a former florist turned botanical printmaker, my love for flowers has always been at the heart of what I do. Over time, I felt a deep calling to work more sustainably, to listen more closely to nature's rhythms, and to create with intention and meaning. What began as fleeting bouquets has grown into lasting works of art—delicate yet timeless impressions of the natural world.

This catalog brings together a curated collection of botanical prints created through a process that honors both craftsmanship and the quiet wisdom of nature. Each piece is an invitation to slow down, breathe deeply, and reconnect—with yourself, with your space, and with the natural beauty that surrounds us.

I hope these pieces bring a sense of peace, beauty, and rootedness to your home. May they serve as gentle reminders to find wonder in the small things and to cherish the fleeting—by turning it into something lasting.

With petals and prints,

A handwritten signature in black ink, appearing to read 'Zizi'.

## Iced Blue Florals

A crimson red Oriental Poppy picked along the roadside, the delicate trembling of Quaking-grass I encountered for the very first time, a uniquely laced Japanese Maple 'Crimson Queen' spotted during my daily walks, and the quietly charming Wood Avenas gathered from the forest—all came together to inspire this floral artwork. Each element was chosen with care, rooted in a moment of connection with nature.

The color palette draws from the ethereal hues of Swiss glaciers—Rhône, Moiry, and Aletsch—whose blues are at once timeless, calming, and deeply evocative. These shades offer a gentle presence, perfect for thoughtful interiors. In a workspace, they encourage clarity and quiet focus; in a living room or bedroom, Iced Blue Florals bring a serene elegance, transforming the space into a restful haven filled with subtle beauty.

# Waterweed Collection

I spent some of the most wonderful years of my life by a lakeside. There's nothing quite like stepping out for a walk and watching every shade of green unfold into one of the most picturesque scenes, with the mountains standing quietly in the background. A gentle breeze in your hair, swans gliding gracefully, birds performing their daily dance—it often felt like nature had staged a private show just for me. Life by the lake felt like a never-ending holiday—and honestly, who wouldn't want that?

The waterweeds featured in this collection were gathered from that very lake—a place deeply rooted in my memories. Each print was thoughtfully composed, with carefully chosen backgrounds to highlight the form and subtle color of these aquatic plants.

Green is a grounding color, deeply connected to nature and renewal. The Waterweed Collection brings this calming presence indoors, while also offering a touch of vibrancy and quiet drama. These pieces make a refreshing statement in workspaces, hallways, or bathrooms—anywhere you'd like to invite a sense of stillness and natural beauty.

---

“Green, the color of life, renewal, nature, and energy, is associated with meanings of growth, harmony, freshness, safety, fertility, and environment. The color green has healing power and is understood to be the most restful and relaxing color for the human eye to view.”

---

## All things natural

One of the most beautiful Japanese maples, *Aconitifolium*, caught my eye on a serene autumn day. Its deeply cut, fern-like foliage glowed in shifting tones of red, orange, and yellow—a quiet spectacle of the season. I took my time to admire its delicate beauty, then gathered a small basket of fallen leaves to preserve their fleeting charm through hand-printed botanical artworks.

The color palette for this set is rooted in nature, featuring soft tones of cream, greyish white, and Persian grey. The minimalist design allows the organic shapes of the foliage to stand out, creating a sense of balance and calm. When paired with natural textures and materials, these prints add warmth and quiet elegance to any interior.

The bedroom, a place for rest and renewal, is the perfect setting for this Japanese maple collection. With its soothing tones and gentle forms, the artwork helps create a peaceful, nurturing atmosphere—an invitation to take a deep breath, unwind, and simply be.

---

"Study nature, love nature, stay close to nature. It will never fail you."

—Frank Lloyd Wright

---

## Botanical Blues

Botanical Blues is a collection of unique botanical art prints in a deep, shaded blue palette. Each piece is handprinted using Red Emperor Japanese Maple branches, capturing their delicate structure and quiet elegance. These prints bring a sense of calm and timeless beauty to any space—whether displayed in an office, living room, or bedroom.

Our mission is to honor the quiet wonder of nature—transforming a simple flower or leaf into a piece of art that invites stillness and reflection. There's something truly magical about preserving what is often overlooked and turning it into something lasting and meaningful.

Inspired by the endless beauty found in the natural world, this collection seeks to bring that sense of serenity indoors. Through these prints, we hope to share the joy and grounding presence of nature—and to inspire a life more connected to it.

## Deep Lake Green Botanicals

Nothing compares to swimming in an ice-cold, crystal-clear lake with the sun shining above. I didn't always know this—having grown up by the sea, lakes felt unfamiliar to me. But that changed the first time I swam in a Swiss lake. It was after a long, challenging hike through the mountains on a hot summer day. I remember the exact moment I jumped in—how the icy water wrapped around me, washing away every trace of fatigue. It was incredibly soothing, almost otherworldly. There's truly nothing like it.

The colors in this pair of botanical prints are inspired by the stunning green hues of Switzerland's many lakes. Each piece is handprinted using the delicate and distinctive Japanese Maple 'Full Moon', chosen for its graceful, significant leaves and calming presence.

Green is a remarkable color for interiors. It brings a deep sense of harmony, connectedness to nature, and a quiet richness that feels both grounding and abundant. Adding this set to your space offers more than just decoration—it creates a peaceful atmosphere while making a bold, natural statement.

---

Personal, calming, and timeless, these lasting art prints offer a sense of connectedness to nature. They bring joy and tranquility to any space—whether it's your home, workspace, or a home away from home.

---

Botanical art prints that are personal, calming, timeless, and lasting—each one designed to foster a deep sense of connection to nature. These prints bring a quiet beauty and serenity to any space, whether it's your home, workspace, or a home away from home.

Every piece in this collection is hand-printed using fresh flowers, foliage, and plants carefully gathered from nature. These impressions are then transformed into premium-quality art prints. Each design is produced as a limited edition of no more than 24/48 prints, individually numbered and hand-signed by the artist.

We value not only aesthetics, but also exceptional quality in both materials and craftsmanship. All prints are produced using high-quality giclée printing on Hahnemühle German Etching paper—a beautifully textured, museum-grade paper that brings out the finest details and tones in every piece.

# Under the Maple Tree

Have you ever sat beneath a tree and gazed up at its branches and leaves? Numerous studies have shown that spending time around trees—and even just looking at their branches and foliage—can reduce stress, lower blood pressure, and elevate mood.

As a botanical designer, my mission is to capture the fleeting beauty of flowers and foliage on paper, giving them a lasting presence through art. When creating this set of prints, I was inspired by the peaceful feeling you get when sitting quietly under a tree—grounded, calm, and present.

**Under the Maple Tree** was handprinted using branches from the Red Emperor Japanese Maple. By arranging different branch sizes in both vertical and horizontal compositions, this series evokes the tranquil sensation of being sheltered beneath a canopy of leaves.

The soft, grayish-peach tones add warmth and freshness to any space. These prints bring light and subtle elegance to your living room, kitchen, or dining area—and add a gentle, sophisticated touch to the bedroom.

---

The grayish peach color would give light, warm and always a fresh look to any space. They will look amazing in your living room, in your kitchen, dining room and also will give soft and sophisticated look to your bedroom

---

WOODLAND STRAWBERRY  
FRAGARIE VESCA

---

Artwork belongs in the kitchen just as much as in any other space. Add a fresh and joyful touch to your kitchen walls with these Woodland Strawberry and Himalayan Blackberry botanical art prints.

---

## Woodland strawberry & Himalayan blackberry

Where I grew up, you could wander freely through the countryside without fear of getting lost or feeling unsafe. It was a wonderfully unrestrained way to grow up. My childhood home sat on a modest mountain, surrounded by farms and golden wheat fields. When summer came, wild strawberries and blackberries grew nearby, ripe for picking. My grandmother would turn the berries I collected into the most delicious jam. I often think about how lucky I was to have a childhood so deeply rooted in nature and its abundance—and for a moment, while picking berries in Switzerland, those precious memories came rushing back.

In today's modern homes, the kitchen has become the true heart of the house. It's where we gather, nourish, and connect—so why not give its walls the same attention as any other space? Thoughtful artwork can bring warmth, personality, and just the right mood.

**Woodland Strawberry** is handprinted using wild strawberries in a soft blush pink, while **Himalayan Blackberry** features pale mint green tones. These prints can be displayed individually or as a pair, and their subtle, refreshing colors bring a cheerful, natural charm to any kitchen space.

---

"Capturing the true beauty of a flower or leaf on paper brings me joy, calm, and a deep sense of fulfillment. There's something magical about transforming something so simple—often overlooked—into a piece of art that soothes and inspires. All my collections are a reflection of the endless beauty nature offers us. Through these works, my hope is to bring the serenity and joy of the natural world into your space—and to inspire a life lived in closer connection with nature."

—Zizi

NATURE-INSPIRED PRINTS

## Original Prints on Canvas

In 2024, we released our first original collection of botanical prints on canvas. **Blossoms of Spring** was inspired by the arrival of the season—when new energy, color, and hope return after a long, dark, and rain-soaked winter.

This collection features carefully hand-crafted canvas panels, each with a softly painted acrylic background designed to evoke a dreamy, light-filled aura. To add individuality and contrast, delicate prints of flowers and leaves are thoughtfully layered onto the surface, creating a unique interplay of texture and form.

A light coat of acrylic varnish is applied to each piece to protect and subtly enhance the artwork. Mounted in elegant wooden frames, these pieces are presented in a way that highlights their craftsmanship and quiet beauty.

A remarkable feature of this collection is the incorporation of natural materials to add texture to the acrylic backgrounds. Poppy seeds and dried petals broken into small pieces, introduce visually captivating and tactile elements in each piece.

The collection presents a wide variety of floral and botanical motifs. From the serene elegance of wild carrots to the whimsical charm of Japanese anemone and the lush allure of spring branches and grasses, these artworks celebrate diversity and the enduring beauty of nature.

Each piece evokes feelings of tranquility, beauty and connection to nature. Whether displayed individually or a cohesive arrangement, these hand-printed artworks lend an elegant and sophisticated air to any space.

Includes eco-friendly grey kraft envelopes

The paper has a lovely natural feel, with the occasional visible fiber and playful speckles

Designed & printed in the Netherlands.

## **'A Day in the Forest'** — New Forest-Inspired Card Collection

Step into the quiet wonder of the woods.

'A Day in the Forest' is a thoughtfully crafted greeting card collection inspired by unhurried moments among the trees — listening, noticing, and breathing in the stillness. It celebrates the beauty in the overlooked, the simplicity of nature, and the calm that comes from being connected to the natural world.

This hand-printed set includes eight woodland favourites: Silver Birch, Hazel, Ash, Blackberry, and Oak.

Each card is made with care and intention, capturing the spirit of the forest in every detail — perfect for heartfelt notes or bringing a touch of nature indoors.
